Dash Portal is a tool that allows travel managers and travelers to seamlessly access their specific travel data using single sign-on functionality, providing personal traveler information including trip details, unused tickets and access to book a trip.

Depending on how Dash Portal was implemented for your organization, you may need to complete certain steps to access your information.

Using Single Sign-On

Single Sign-On (SSO) allows you to access Dash Portal without having to input your credentials (user ID and password). If Dash Portal has been implemented utilizing the SSO, users will simply click the link located on your company's Intranet to enter and be automatically logged into Dash Portal.

Learn more about Dash Portal including an overview video for travelers and travel managers on how to navigate through Dash Portal.
